

Corroseal

CORROSEAL BG PRIMER

DESCRIPTION: Petrolatum based compound designed for use as a surface preparation for underground and underwater conditions, also as a priming medium prior to the application of Corroseal or for corrosion protection of small metal components.

Corroseal Priming Paste is a compound refined saturated petroleum hydrocarbons, inert filler and passivating agents, which will not crack or harden and remains permanently flexible.

Highly resistant to minerals, acids, alkalis, salts and the marine environment.

TECHNICAL DATA

SPECIFIC GRAVITY	Approximately 1.1
TEMPERATURE RANGE	0°C to 40°C
COVERAGE	2-5m ² /kg
PACKAGING	1kg, 2kg, 4kg and 20kg
